## ORIGINAL ER-DIAGRAM:-

## MODIFIED ER-DIAGRAM:-

Changes made:

1. Since there is no need of entity Person defined here as we already have entity Rider which have the same attributes, we are removing that entity from the original ER-Diagram.So our modified ER-Diagram does not have this entity.

2. There was no relationship defined between Requests and the other entities in the original ER-Diagram. We defined a new relationship between entities Requests and Ride. i.e. A Rider will make Requests to Ride.
